Dear To Whom It May Concern:

I would like to take this opportunity to show my support for the "Proposals To Increase The Availability Of Approved Animal Drugs For Minor Species And Minor Uses" Discussion Draft.

There is currently a lack of approved drugs for aquaculture, and options available under laws are inadequate. In my opinion, this Discussion Draft addresses the lack of approved drugs for aquaculture by outlining some innovative proposals to increase drug availability, while maintaining the safety of our human food supply.

Sincerely yours,

Jay Dickey
